Resolve: That the City Council hereby declares September 24  
“Malden Latino Business and Workers Appreciation Day”

WHEREAS the contributions of Latinos have been and remain essential to the success and well-being of our nation, and

WHEREAS Latinos are starting businesses at a faster rate than the national average across several industries, growing 34 percent over the last 10 years compared to just 1 percent for all other small businesses; and

WHEREAS Malden has seen an increasing growth of Latino-owned businesses during that same time period; and

WHEREAS Latinos account for 85% of all farmworkers, 59% of the country’s construction crews, 53% of all employees in food services and 39% of the nation’s total workforce and that Latinos make up a large portion of the labor force in service sectors that were considered essential after the COVID-19 pandemic started (some 65%); and

WHEREAS The Covid-19 crisis has hit Latino small businesses particularly hard, including not being able to access PPP funding at a similar rate to other business owners. And many individual proprietors or small, family-owned businesses may feel the impact of Covid more directly, as the pandemic has disproportionately impacted the Latino community.

Now therefore in recognition of Hispanic Heritage Month, be it resolved, that the Malden City Council:

- (1) Recognizes the important and increasing contributions that Latino businesses and workers make to Malden and our regional economy, and
- (2) Thanks all our essential workers, including the many essential Latino workers, who have ensured during COVID-19 that food continues to reach our table, our health care system continues to function and that our economy stays strong, despite the risks to themselves and their families, and
- (3) Recognizes the disproportionate health impact and loss of life in the Latino community due to COVID-19, and
- (4) Hereby Proclaims Friday September 24, 2021 as Malden Latino Business and Workers Appreciation Day and call on residents to frequent our many Latino Businesses on that day and through-out the year
