Here's a polished version of your letter:

Subject: Comments Regarding National Grid Petition for New JO Pole P4799-84

I am writing regarding National Grid's petition to install a new JO Pole (P4799-84) on Floral Avenue.

Most of the utility poles on Floral Avenue are located on the odd-numbered side of the street. Given the existing pole configuration, I question whether it is necessary to install an additional pole directly across the street from an existing pole.

From a visual standpoint, the proposed placement would be unattractive and could negatively affect the appearance of the neighborhood.

Additionally, there are no new homes or developments in the area that appear to require this new infrastructure.

If the purpose of the proposed pole is to provide support for Pole P4799, I would suggest that National Grid instead repair or replace the existing pole, which appears to be deteriorating due to rot, rather than installing an entirely new pole.

Thank you for considering my comments.

Sincerely,

Maria D'Esposito
81 Floral Ave
